Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 and 11-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Fett '608. Fett shows an axle arrangement including a spindle 12, an axle 31, a pair of taper roller bearings 16, a hub 19 and an unlabeled retainer on the spindle.

Allowable Subject Matter

Claims 7-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The prior art does not anticipate nor render obvious the invention of an axle arrangement as claimed in combination with a vehicle service brake or a planetary gearing.

Prior Art Discussed

The examiner has considered the references cited by applicant in his Information Disclosure Statement filed October 14, 2003. None of the references show all of the features of the claimed invention.

The references cited by the examiner are deemed pertinent to applicant's disclosure.
